

APPLE PEELING MACHINE

MODEL UOK-01

ONE
MACHINE,
MANY
OPTIONS!

The biggest advantage of UOK-01 is the flexibility and versatility. The standard equipment enables:

- peel removal
- coring
- cutting in half or 3 segments
- pedicel/sepal and stalk remnants removal

Another asset of UOK-01 is the possibility of disabling, at any time, one of the above functions except for coring.

Modular structure of the machine allows for the exchange of cutting/slicing units, which can divide the fruit in 4, 6, 8 or 12 segments.

Additionally, each previously cut segment can be cut horizontally into 3 parts or vertically into crisps of adjustable thickness.

- MACHINE'S EFFICIENCY - UP TO 100 OBJECTS PER MINUTE -

OPTIONS:

coring

peel removal

exchangable cutting units, which cut in:

4 pieces

6 pieces

8 pieces

12 pieces

slices

cutting out the recess
caliber and peduncle

additional
coring of a seed nest

ADVANTAGES OF UOK-01:

- flexibility and versatility
- fast operation – double peeling head
- efficiency up to 100 pcs. per minute
- high quality - longlasting stainless steel components
- machine's construction complies with the norms for food processing industry
- construction minimalizes the sedimentation of fruit residue and enables easy cleaning
- automatic lubrication systems
- designed for different shape and variety of apples

WE PROVIDE:

- customized design, assembly and start-up
- trainings regarding the line's operation and optimal of settings
- professional technical service 24/7 h
- beneficial maintenance and service packages
- warranty and post warranty servicing and inspection

We offer a design of a complete line and solutions for the particular stages of the production, among them:

I SORTING STAGE: grading	Sorting is an ultimate stage preceding the stage of peeling in order to obtain the efficiency and minimize the waste. The most popular sorting machines are models: CUP and RDS.
II TRANSPORTING STAGE: infeeding	Bin Tipper SWP-D-01 Air Bubble Fruit Washer MWP-01 unloading robot models: RZP and RZP-G
III MAIN STAGE: peeling	Apple Peeling Machine UOK-01
IV OUTPUT STAGE: purification	Vibrating Screen PWP-01 Sulphurisation Tub WSJ-01
V FURTHER STAGES: packing, cube cutting, freezing, drying
